U tabeli su prikazani indeksi koji su formirani nakon izračunavanja priplodne vrednosti uz uvažavanje relativnog značaja osobina obuhvaćenim odgajivačkim ciljevima
Indeksi su prikazani pojedinačno po osobinama, odnosno grupama osobina koje su uključivale: mlečnost, telesnu masu, plodnost i eksterijer.

Mlečnost: količina mleka, količina mlečne masti, količina proteina mleka, sadržaj mlečne masti, sadržaj proteina mleka

Telesna masa: telesna masa jarčeva, telesna masa jaradi na rođenju, telesna masa jaradi sa 30 dana, telesna masa jaradi sa 90 dana

Plodnost: godišnja plodnost, ukupna (životna plodnost)

Eksterijer: visina grebena, dužina trupa, širina grudi, obim grudi, obim cevanice, obim testisa

Priplodna vrednost je izračunata samo za priplodnjake za koje su postojali kompletni proizvodni podaci

Procena priplodne vrednosti izvršena je primenom univarijatnog modela oca (sa i bez ponovljenih merenja)

Rangiranje priplodnjaka izvršeno je za svaku grupu osobina pojedinačno je nakon formiranja indeksa

Ukupni indeks

U tabeli su prikazani indeksi koji su formirani nakon izračunavanja priplodne vrednosti uz uvažavanje relativnog značaja osobina obuhvaćenim odgajivačkim ciljevima

Indeksi su prikazani zbirno za sve uključene sobine : mlečnost, telesnu masu, plodnost i eksterijer.

Mlečnost: količina mleka, količina mlečne masti, količina proteina mleka, sadržaj mlečne masti, sadržaj proteina mleka

Telesna masa: telesna masa jarčeva, telesna masa jaradi na rođenju, telesna masa jaradi sa 30 dana, telesna masa jaradi sa 90 dana

Plodnost: godišnja plodnost, ukupna (životna plodnost)

Eksterijer: visina grebena, dužina trupa, širina grudi, obim grudi, obim cevanice, obim testisa

Priplodna vrednost je izračunata samo za priplodnjake za koje su postojali kompletni proizvodni podaci

Procena priplodne vrednosti izvršena je primenom univarijatnog modela oca (sa i bez ponovljenih merenja)

Rangiranje priplodnjaka izvršeno je za sve grupe osobina zbirno nakon formiranja indeksa
